Everyone has an ideal of "how it should be" in our daily life. The value we attach to living spaces is changing. It’s not luxury in appearance you’re looking for and neither is it just more convenience. But it’s something that gladdens your heart. It’s your very own experience and something that can’t compare with anyone else’s. We think that this defines future luxury.

The new L-CLASS offers a single rich value that speaks to your heart.

Experience the adaptability that creates your ideal space to transcend conventional concepts of a kitchen, bath and dressing room. Sophisticated materials, design and state-of-art functions — these will allow you to experience a new lifestyle supported by your own unique and easy-to-use life spaces.

For anyone who enjoys living life to the fullest — the new L-CLASS was made for you.

A place that helps create moments that fill your heart

L-CLASS
More than ever, the kitchen is becoming the center around which your home life revolves. Around the kitchen, family members and friends gather and talk. The kitchen is more than just a place for preparing and enjoying delicious food but also a central location for hobbies, learning, games, for any activity that pleases the family. Ideal home life really starts with the kitchen.

Panasonic has thought it all through. That’s why we’ve been able to come up with the raw materials and textures, provide ease of use and diversified plans to meet your specific requirements. It’s how we can achieve truly functional style while fitting in beautifully with the surrounding interiors.

Now’s the right time to be more particular and to think of yourself. Talk about your dreams and a kitchen that meets your own stylistic desires and way of life.

Color tones vary between printed material and actual products. Please confirm color tones with actual product samples.
Color tones vary between printed material and actual products. Please confirm color tones with actual product samples.
The low-profile countertop offers a sophisticated appearance.

Design & Detail

Effectively designed details create beautiful spaces.

We created a neat, easy-to-use comfortable space.
A well-crafted cupboard for neatly storing favorite appliances, tools and even refrigerators in an easy-to-use manner.
We achieved a design that blends in and harmonizes with the surrounding space by integrating the handle into the door.
The counter offers a slim and stylish appearance.
Bringing about a pleasant relaxed feel through careful selection of raw materials that deliver a feeling of natural warmth that’s also smart and one that enhances the whole space.
The perfect fit of the end panel and bottom shows the kitchen like beautiful furniture.
These artificial marble countertops are made by compounding organic glass materials with natural mica to exhibit a deep and clear look. The uneven surface finish that reproduces the expression of genuine stone offers resistance to scratches and also facilitates cleaning as the material incorporates water- and oil-repelling components.
The storage area for small appliances is at convenient height and the same depth as the cabinets, which creates a flat look that blends in refinedly with the surrounding space.
Coordinate

Creating spaces to express your individuality

The distinctive features of door and counter materials, the personality inherent in their textures, the impressions of color and light – all these elements resonate to create your unique home interior style. We offer an extensive variety of doors, counters, and other premium-quality items for the ultimate freedom in kitchen coordination.
Doors in a wide variety of finishes and materials, including beautiful paint and natural wood, have a profound look that combines with highly decorative countertops to create a higher-grade dining space in rich color variations.

Kitchens should make everyday cooking enjoyable. Your kitchen is a space for your very own home, and each has its own story. That’s why our 16 Series offers a lineup totaling 100 door color patterns based on a “tone color” theme.

Color tones vary between printed material and actual products. Please confirm color tones with actual product samples.
For Order, please see the information on page 55.
The drawer bottom is made of a stainless steel that stays beautiful and is easy to clean.

The unit color can be chosen from super white and charcoal gray.

Stainless steel rails are also available.

Color tones vary between printed material and actual products. Please confirm color tones with actual product samples.
You can choose the color of the small appliance storage unit. The unit is also available in a stately grain tone that adds a decorative accent to the monochrome door. It harmonizes with furniture just like sophisticated one.
WonderFULL Cabinet

Easy to store, Easy to take out.
Advanced, large-capacity storage → P.80

FULL use of the depth without waste
The drawer opens smoothly when pulled making it easy to use both the front and rear space.

FULL use of the height without waste
Three-dimensional storage achieves effective use of limited space.
The ideal height allows effective use of the space.

Sticking to the ease of use in every detail
As the cabinet is used every day, we stuck to the easy of use and maintenance in every detail.

*1: 575-mm depth is of the deepest type. The depth varies according to specifications and drawer type.

Effective dimensions

![Effective dimensions diagram]

Ample depth approx. 575mm

Synchro pallet (Unit under the sink)
The inner drawer comes out because it is interlocked with the retracting slide. This helps store bowls and colanders.

Shelf board under the Hob

Adjustment panel / Side panel (middle shelf)
These panels prevent stored items from protruding to the side and allow items to be stored in the upright position to make effective use of the space.

Bottom plate clad with stainless steel
Designed to provide beautiful appearance and ease of cleaning except small drawer located under the Hob.

Color tones vary between printed material and actual products. Please confirm color tones with actual product samples.
Smart and effective use of space achieves three-dimensional storage of the right item in the right place.

Storage of the right item in the right place leads to ease of use.

We worked out the optimum storage locations in accordance with the frequency and place of use of items to be stored, including storing frequently-used items within reach. This helps you readily use and tidy up the kitchen at the same time.

Highly efficient storage allows you to slip out something you want just by opening the sliding drawer.

Conventional kitchen

[ Hinged door ]
You could not place or retrieve anything without crouching.

L-CLASS KITCHEN

[ Sliding drawer ]
The full-open type of drawer allows you to pull the drawer out so that the rear area is exposed and use it in a comfortable position.

Unit under the Hob (example)

You can see all the contents at a glance to take out anything you want. The effective use of the space has enhanced the storage efficiency.
**Arrangements for easy reach**

Wall unit

- Earthquake-resistant lock mechanism

This mechanism locks the door when tremors are detected, to preventing stored items from toppling out.

Slowly lowering wall unit

*The mechanism is mounted on the hinged door of the wall/middle unit.

**Arrangements to make effective use of the space**

Unit under the Hob

- Smart pallet

Unit under the sink

- Synchro pallet

1st drawer from the top

(1st drawer from the top)

Frequently-used small items

2nd drawer from the top

- Frequently-used large items and heavy items

**Make the space that was hard to use easy to use.**

Unit under the cooking space

1st drawer from the top

(1st drawer from the top)

(The photo shows the adjustment tray)

2nd drawer from the top

(Floor stocker)

Seldom-used small items

The shows the stainless steel specification. [On order] Color tones vary between printed material and actual products. Please confirm color tones with actual product samples.
Assuring smart storage of food, dishes, and small appliances in positions convenient for use

**1 Smart storage of small appliances**

**Storage of small appliances in a fixed position is assured.**

The shelf is designed to store small appliances at a height convenient for use and provided with a steam treatment function that allows you to use the small appliance without pulling out the shelf. A wood grain pattern is also available.

*The photo shows the cupboard with the door dismounted to explain the functions.*

**Small appliance storage unit → P.97**

If the unit color is charcoal gray or super white, the unit will come with a light-gray slide shelf and aluminum front panel.
Smart storage of dishes

Cupboard with “Rotary Basket” → P.100

As the rotary basket opens, dishes stored in the back can be taken out right away. An inner drawer is provided to quickly place dishes on the top of a stack of dishes or retrieve them from stacks. The cupboard has a large storage capacity and is designed so that contents are visible at a glance.

Smart storage of dust box

Dust box wagon → P.101

The dust box wagon is available for the smart storage of dust box. Dust box wagon can separate and store recyclable trash.
We can provide you with the style best suited to your space conditions and lifestyle.

*In addition to the plans below, we can respond to diverse needs. Please contact your planner for details.*

### Wall-mounting kitchen plan

**I type for wall-mounting kitchen plan**

Basic style consisting of a sink and Hob arranged in one line. This plan offers a flexible kitchen layout that can be worked to meet space conditions.

*Planned depth: 933 mm*
The following section shows basic plans available with WEB How’s. These plans are also available in sizes and layouts other than those listed below upon request. There are restrictions on certain combinations of sinks and Hob depending on the opening width.

* Not listed in this catalog, but available upon request.

The opening width of the I type to L type of the wall-mounting kitchen plans is adjustable in steps of 10 mm with WEB How’s.

** Float open kitchen with the Hob side mounted to the wall **

Flat open kitchen with the Hob side mounted to the wall

- Depth of counter: 650 mm on the oven section, 933 mm on the sink section

** Flat open kitchen for tall storage plan **

Flat open kitchen with tall storage units mounted to the back surface of the Hob

- Depth of counter: 650 mm on the oven section, 933 mm on the sink section

** Flat open kitchen for bearing wall plan **

Flat open kitchen for supporting a bearing wall in the home’s framework

- Depth of counter: 650 mm on the oven section, 933 mm on the sink section (750 mm is also available for this plan)

** Floating type for flat open kitchen plan **

Floating type of flat open kitchen with the Hob side mounted to the wall

- Depth of counter: 933 mm

** Semi-floating type for flat open kitchen plan **

Floating type of flat open kitchen with the Hob side mounted to the wall. It has a small footprint and is fit in the kitchen like a piece of furniture.

- Depth of counter: 933 mm

The depth of the counter and the combination of units are selectable.
Freely mix and match your "Favorite" kitchen from a great selection of units, materials and finishes.

Selectable doors

Available in a wide variety of finishes and materials, including eye-catching colors and stately-looking natural wood.

100 Patterns

For Order, please see the information on page 55.
Selectable counters

23 Patterns

The worktop greatly affects how the kitchen looks and changes the atmosphere depending on how it is coordinated with the door material.

Artificial marble

Selectable handles

10 Types

Handles are the most often touched part of any kitchen and an important design component essential to how the kitchen ultimately looks.

Selectable units

The bottom plate is made of easy-to-clean stainless steel. The unit color can be selected from super white and charcoal gray to match the decor.
Personalize your kitchen in every minute detail, including the fit of the counter and colors.

Selectable fit of counter and end panel*1

The atmosphere and usability vary with the thickness and fitting method of the counter and end panel. You can select them according to your preference.

*1: Some selections are not feasible due to the pattern of the counter, kitchen plan, equipment, etc.

For Order, please see the information on page 55.
We can produce a door in an original color matched to your favorite interior.

For example, by matching the color of the door to your furniture or coordinating it with the color of interior fabric, we can produce a one-of-a-kind door in an original color such as a pearl-like color.

*The lead time varies with requirements for the door. For details, please contact your Panasonic distributor.

**STEP1**
Please prepare a sample of your favorite color.

**STEP2**
We will mix paints to prepare a sample.

The color is just as I imagined!

**STEP3**
After the sample is accepted, we will produce the door.

Completed!

**Door in an original color (Only for painted doors)**

Panels marked with "*" require longer lead time for shipment than usual.

Color tones vary between printed material and actual products. Please confirm color tones with actual product samples.
By providing lighting, installing cabinets, or adding a table, we can "personalize" your kitchen just for you.

The door is divided into squares that makes it look stylish from the dining area. A combination of door patterns in white and walnut color adds an accent to the space.
This plan combines a kitchen system and dining table into the perfect place for the family to gather together. When looking at the kitchen from the living area, you will be impressed by the design.
Floor pattern selection is also important towards creating an atmosphere in the room. We can "coordinate" the floor to fit your door.

Rest assured that, despite any restrictions or necessary renovations, we will work with the building conditions in an attentive and detailed manner.

Even if space is limited, the size of the kitchen can be adjusted to your house.

In order to avoid interference with windows, the height can be changed to make effective use of space. (Order)

Even in case of any restriction on the opening, the width can be changed to make the kitchen tightly fit into the wall. (Order)

The kitchen can be tightly fit into between the walls.

The locations of the sink and Hob can be changed.

The allocation of space for the sink and Hob and the combination of storage units and built-in apparatuses can be selected.

*The following plan is one example. Other combinations are also available.

- Space for small appliances / serving
- Space for drying dishes
- Standard plan
- Plan focused on functionality
- Plan that increases the space beside the Hob

Applicable to depth of 600 mm

Most old kitchens are 600 mm in depth. These kitchens can be directly replaced by the current kitchen without restricting passage. (Order)
Components are processed so as to tightly match the building conditions.

The counter and the unit are cut to the size of the post and beautifully fit into the space. *(Order)*

Even in case of any beams like those found in condominiums, the kitchen can be tightly fit into the space.

*Sizes and positions for which the post can be cut out vary with the pattern of the counter and the kitchen plan.

Piping space can be secured while ensuring storage space.

**Support for dividing a bottommost drawer (support for renovation)**

The piping space can be secured while enduring the storage space by dividing the bottommost drawer.

*The piping space is fixed. Fixed = Fixed door (The door does not open.)*

In addition, units with piping space are available upon request. For details on lineups and prices, see the Design catalog.

**Combination patterns for the piping space and sliding storage units**

- The combination patterns shown below can be calculated with WEB How’s.
- The positions of the piping space can be rearranged on-site.

*Sizes and positions for which the post can be cut out vary with the pattern of the counter and the kitchen plan.*

Point recommended by Kitchen Planner

Designed with a counter having different depths on three sides, the U type kitchen plan secures a wide work area in a limited space. A popular option is to match the door and counter so that the look is simple but in good taste.
The L type is provided with a spacious island counter that is easy to use for making sweets and hosting parties. The rail and ornamental window made of natural wood create the feeling of the traditional, chic French kitchen.

Point recommended by Kitchen Planner

Remindful of an old farmhouse, this kitchen is perfect for spending time together and hosting parties.
Please let us hear your feelings.

What we think is important to respond to the feelings of each and every one of you.

At our showroom, professional advisors offer courteous consulting.

You can touch actual kitchens and operate the equipment.

To cast your hopes and dreams into shape, please visit our showroom.
If you have any clippings or photos from magazines, please bring them along with you to the showroom. This will help you accurately convey your thoughts and make discussions proceed smoothly.

Assuming everyday life, slippers have been prepared in the showroom. Please check the counter height after taking off high-heeled footwear.

SHOWROOM PLANNING STEP

STEP 1 Come to the Reception Counter.

Feel free to talk to our staff so that they understand what you want. Our professional advisers will make suggestions on kitchen styles that fit your tastes and lifestyle.

STEP 2 Have a look at various kitchen plans.

At our showroom, the latest kitchen plans are on display. We will show you around the showroom, because we want you to see a variety of different kitchen styles and expand your idea of what you can do. In addition, there are room exhibits that show how kitchen equipment can be coordinated with various interiors. Seeing different styles will help you find what suits you.

STEP 3 Try operating the actual equipment.

What about the height and area of the counter? Why not change into slippers and stand in front of the counter and sink? We are sure you will discover the counter height and workspace perfect for you.
Please bring a floor plan with you. We recommend that you measure the locations and sizes of windows and doors in your kitchen, as well as the sizes of your refrigerator, small appliances, and cupboard in advance. This helps us to plan your dream kitchen.

Color samples help a lot. Even when the same term of blue is used, it involves different tastes such as sky blue, azure, and navy blue. It is recommended to bring color samples such as your favorite colored paper along with you. This helps you select a door pattern.

Horizontally extend your arms. The distance between your furthest fingertips is nearly equal to your height. In addition, measure the size of your hand. This helps you estimate the depth of the drawer.

What about the usability of the storage equipment?
The best way to check the usability of drawers and motor-driven elevating wall units is to actually move them. You should see for yourself the clever ideas behind these storage units.

What about your favorite door pattern?
If you touch doors one by one, you will find surprising differences in texture and color tones among them. The way a door looks varies with the door pattern, handles, and matching counter. Take time to compare the door patterns.

What about interior doors, flooring materials, and lighting?
As for the sizes of interior doors and flooring materials, you should see and carefully check the actual products. If you effectively use different types of lighting, you will be able to produce relaxation and fun moods as you want. Experience various atmospheres.

Our planners prepare a drawing.
Our professionals plot your kitchen on a perspective projection and CG graphics, and show you specific combinations of door colors and units. When your dream is put into shape, you get excited, don’t you?

Marks related to product specifications

Universal Design Mark
Panasonic chooses UD products according to its internal standards and puts this UD mark on them to highlight their features/advantages.

Mark for featuring the delivery of product

U Order Product
U Order allow you to customize standard products to your taste by changing door colors, unit shapes, dimensions, and layouts.

Other marks

Kids Design Award
The Kids Design Award is a prize that is awarded to designs that contribute to the safety and security of children, open a path to creativity and the future, and make it easier to have and raise children.

Good Design Award
The Good Design Award is a comprehensive design evaluation and commendation system in Japan. It is not intended to simply stimulate competition in the beauty of things, but to award a prize to designs that develop various industries and enhance the quality of people’s lives.

Color tones vary between printed material and actual products. Please confirm color tones with actual product samples.
Door variations available in 16 series and 100 patterns.
Handles available in 10 types.

You’d like to have a kitchen where you can enjoy cooking every day. A kitchen just for your home, that’s why there is a story to tell. After listening to such desires and contemplating color tones, Panasonic chose 16 series of cabinet doors in 100 color patterns.

Handle-less design with a door and a hand grip integrated into one unit. Panasonic finishes this flagship door series by applying a coat of paint to every door panel with craftsmanship.

Chocolate [AU]  Beige [AQ]
Olive Green [AZ]  White [AA]
Plum Red [AX]  Matt white [AS]*
Gray [AJ]  Matte metallic [AM]*

Grade 80
LAPLESS 80 Series (single color)*

Not available in matt white [AS] and matte metallic [AM]
Showy door series Panasonic has designed and dedicated to men and women who are living a brilliant life. A careful finishing coat of paint applied to every door panel with craftsmanship makes your cabinet doors attractive.

Grade 70

PRALLTRILLER 70 Series
(single color)*

MAESTOSO 70 Series
(Wood grain pattern)*

The Maestoso 70 Series uses sliced veneer made of natural wood to produce a masterful look. The natural grain creates an ambiance in which time passes slowly and calmly.

Products marked with * require longer to delivery than usual.

The wood grains and single color patterns marked with * may differ in direction (vertical or horizontal) depending on where they are used. Please refer to the information on pages 67 to 69.
The Religioso 60 Series offers time-honored traditional framed doors that are finished by applying a high quality texture to the natural-wood material. The Series is also available in a new elegant white-based color.

Doors & Handles

Grade 60

RELIGIOSO 60 Series
(Wood grain pattern *)

Wood grain pattern
Natural wood sliced veneer

Grade 50

ARCO 50 Series
(Single color/ Wood grain pattern *)

The Arco 50 Series is simply designed without handles to express the beautiful straight-grained pattern seen with stringed instruments. A lineup of white and beige colors that give cabinet doors a calm appearance is also available.

- The aluminum handle (LCA) and long bar handle (HFS) cannot be mounted on the Religioso 60 Series.
- The shape and whether a door frame is included or not vary with the size of the door. (For details, please see the information on page 69.)

- Guinnes Wenge [33]*
- Ebony Dark [40]  Mirror surface

- Pearl Silver [29]  Mirror surface
- Walnut Natural [35]*
- Rough sawn Elm [41]  Mirror surface
Products marked with * require longer to delivery than usual.

The wood grains and single color patterns marked with * may differ in direction (vertical or horizontal) depending on where they are used. Please refer to the information on pages 67 to 69.

Color tones vary between printed material and actual products. Please confirm color tones with actual product samples.
Doors & Handles

The Lebhaft 40 Series vividly distinguishes the wood grain patterns by overlaying a variety of woods of different colors and tones.

Can be coordinated with VERITIS Series Interior Materials.
(Excluding the XR pattern)

The Allegro 30 Series uses bright pleasant color patterns to give kitchens an allegro tone. The door patterns are designed in basic colors for easy coordination.

Black Oak [XJ]

Cherry [XP]

Navy Oak [XZ]

Oak [XK]

Blue Grey Oak [XG]

Maple [XN]

Smokey Rose [XR]

White Oak [XW]

Walnut [XT]

Dark Brown [RT]

Blue [RB]

Medium Beige [RQ]

Pink Beige [RP]

Light Beige [RL]

Yellow [RY]

White [RF]

The Ritardando 30 Series offers a simple, matt white door that blends into white wall kitchens as if it were custom-made furniture.

Matte White [JS]
The Marcato 30 Series makes every kitchen unique by using simple, shiny transparent colors. The catchy glass-coated look is one of the features of this Series.

The wood grains and single color patterns marked with * may differ in direction (vertical or horizontal) depending on where they are used. Please refer to the information on pages 67 to 69.

Color tones vary between printed material and actual products. Please confirm color tones with actual product samples.
The Trill 30 Series offers wood grain doors with a mirror surface and subtle changes to the tone and pattern of the horizontal grain that produce a rhythmical atmosphere. The lineup includes a simple line pattern and a shaded pattern.

The Arpe 20 Series offers lively, horizontal wood grain patterns that project a soft warm look that is easy to coordinate with most indoor spaces.
Basic, single color door series. The lineup of the Giocoso 20 Series includes a bright yellow pattern that creates a joyful ambiance, in addition to white, grey, and beige patterns that readily match interior decors.

The Moderato 10 Series provides a lineup of two monochrome patterns — white and dark grey — that easy match any indoor space. This Series can produce a simple mood in moderate color patterns.
Precautions for using doors and handles

The appearance of a kitchen varies with the design of the handle you choose in addition to the color of the cabinet doors.

- The grip handle (HFS) and the aluminum line handle (LCA) cannot be chosen for the Religioso 60 Series and Rondo 50 Series.
- Combination with the slim counter is available only with the FPS system.

Handles for corner wagons (90 cm x 90 cm, see page 85) and for Smart Step/Low Step open kitchens are only available in one dedicated type regardless of the door pattern.

Some of the handles shown above cannot be mounted on doors of some shapes and types.

Please choose your favorite handle from the 10 types shown below.

- Sold at the same price.
- *(Material)* Aluminum ([HHS] only zinc)

[HFS] *1  [HAS]  [HAE]  [HAW]  [HCB]  [HDE]  [HDA]  [HDE]  [HHS]  [HCA] *1 *2

*1: The grip handle (HFS) and the aluminum line handle (LCA) cannot be chosen for the Religioso 60 Series and Rondo 50 Series.
*2: Combination with the slim counter is available only with the FPS system.

- Handles for corner wagons (90 cm x 90 cm, see page 85) and for Smart Step/Low Step open kitchens are only available in one dedicated type regardless of the door pattern.
- Some of the handles shown above cannot be mounted on doors of some shapes and types.
- Cabinet doors of the Lapless 80 Series and Arc 50 Series are designed with an integrated handle, therefore the handle cannot be chosen.
- The HCB handle has some fluctuations in the colored coating so that it will exhibit a sophisticated texture.

[HHS] Handle

The HHS handle is oval in shape and designed to go with framed doors and give a modest accent when used in combination with flat doors. It is finished with a luxurious chromium-plated mirror surface.

The cross-sectional shape is designed to fit fingers perfectly and make cabinet doors easier to pull out.
Directions of wood grain patterns:
Because plate sizes and printing techniques vary from series to series, grains printed on the door, end panel, and upper baseboard may run in different directions (vertical or horizontal).

<table>

</tr>
</tbody>
</table>
Doors & Handles

Matt metallic door pattern
The matt metallic door pattern fits minimalistic designs that focus on functional beauty. The matt shade with reduced gloss fits into a variety of different interior décors without making a loud statement. The color hue varies in the direction in which you look at the door and the angle of light, therefore you will be entertained by the different appearances of your cabinet doors.

Caution: For doors with wood grain pattern/single-color grain pattern (doors marked with * * * on pages 57 to 64)

For wood grain patterns:
The characteristics of each individual tree such as the different tones between the grains, core wood and sapwood are shown on the sheet.

(Example) LEBHAFT 40 Series

[Sugar] Brown and black spots appearing in dotted lines along the grain of maple wood

[Tiger stripes] Rare wood grain pattern that is specific to oak wood and resembles the pattern of tiger fur

[Stripes] Shade of striped grain pattern unique to walnut

[Guar pockets] Black spots and grains caused by solidified resin specific to cherry wood

For using the Natural Wood Door Series:
Doors made of natural wood/natural wood sliced veneer have moderate color variations, spots, and gnarls unique to natural wood, therefore the wood grain patterns vary with each door. Furthermore, wood doors take on a seasoned look as time goes by because of color changes. Please note the foregoing precautions before choosing natural wood cabinet doors, in order to make effective use of resources.

For door samples, please visit a Panasonic showroom.

Depending on the wood grain, the patterns on adjacent cabinet doors may differ significantly, which can give the whole kitchen plan a different look or, inversely, instill a feeling of uniformity.

*Particularly the inconsistencies are noticed more with horizontal grains.

For framed doors:
Please note that the shape of the door varies with its size.

**RELIGIOSO 60 Series**

- Rail (Horizontal pattern)
- Side (Vertical pattern)
- Panel (Vertical pattern)

The photo shows the Religioso 60 Series Brown Oak (NY).

**RONDO 50 Series**

- Rail (Horizontal pattern)
- Side (Vertical pattern)
- Panel (Vertical pattern)

The photo shows the Rondo 50 Series Oak Pattern (P5).

Framed doors with simple frame materials joined by miter joints. The product lineup includes frames coated in a single color such as white or beige, which is the standard trend in Europe, besides the basic wood grain patterns. The frame-assembled non-seamless design produces a moderately elegant atmosphere in a modern space.

**Items finished in a flat shape without frame:**
- Front door of the small drawer beside the oven
- Front panel of corner wagon measuring W900 x L900
- 750-wide side door for corner measuring W105 x L750
- Floor sliding door for Low Step open kitchen
- Beam notch of the upper apron of the range hood door
- Front door of filler

*When making a change to the unit size through U Order:
The delivered doors may be flat and without any rails depending on the door size. Please contact your Panasonic representative, if you have any concerns.

**Items finished in carved shape (Not framed):**
- Front door of floor stocker when changing the counter height to 800 mm
- Front door of the small drawer beside the oven
- Sliding front door of 1.8-liter bottle storage of 150 mm in width
- Front panel of corner wagon measuring W900 x L900
- 700-wide side door for corner measuring W105 x L750
- Floor sliding door for Low Step open kitchen
- Beam notch of the upper part of the range hood door
- Front door of filler

*When making a change to the unit size through U Order:
The delivered doors may be flat and without any rails depending on the door size. Please contact your Panasonic representative, if you have any concerns.

**For flat surfaces, the door is designed to have four edges.**
(Edge material in the same color pattern as that of the door)

**Example:**

150 mm in width 1.8-liter bottle storage

Front door of floor stocker (when the counter height is 800 mm)

**Guide price index table by door grade**

*For standard kitchen plan with Type I 2550 gas oven*

When taking each door grade as 100, the approximate price index for other door grades comes to be as listed in the table below. When changing the pattern from Grade 60 to Grade 80, the guide price can be calculated by multiplying the price by the estimated approximate price index of 113.

</tr>
<tr>
<td><strong>Flat open/island kitchen plan</strong></td>
</tr>
<tr>
<td>The floating type and semi-floating type kitchen plans are only available in a depth of 933 mm.</td>
</tr>
</tbody>
</table>

I Selectable counter height

| 3 counter heights |
| Counter height can be selected from 80 cm, 85 cm and 90 cm to accommodate your body height. |

Guide for easy-to-use comfortable counter height

- **Body height (cm) ÷ 2 + 5 to 10 (cm)**

Since the way people use their kitchen counter is different from person to person, please come to check the counter height at the Panasonic Showroom. We urge you to try out our kitchen counters at the showroom in carpet slippers.

- Counter height cannot be adjusted with some plans and units.

I The thickness of the counter and the method for mounting the end panel are also selectable (See *1).

<table>
<thead>
<tr>
<th>Overhanging end panel</th>
<th>Mounting the end panel to the bottom of the counter</th>
<th>Mounting the end panel to the bottom of the counter + Changing the thickness of the counter (See *2)</th>

<td></td>
<td></td>
</tr>
<tr>
<td>The gate design (See *4, 5) produces a more luxurious atmosphere.</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

*1: This selection is not available with some counter patterns, kitchen plans, and components.
*2: Unless the thickness of the counter is 40 mm, there is a limitation to the models of Hobs that can be built in the counter.
*3: Caesar Stone and Greige counters are not available in a thickness of 60 mm.
*4: The artificial marble counter covers from the side to the top panel of the unit.
*5: The gate panel is not available for slim counters.
“GRALIO” Superb counter made of super shiny material organic glass-based material

Faithfully reproducing natural stone
The Gralio Series of artificial marble counters reproduce the “Glitter” and “Lamination” that natural stone has with the transparency of organic glass and the sparkle of mica. These counters create a more luxurious atmosphere.

The Gralio Series is available in the following five patterns.
- Granite Black [KE]
- Slate Black [KC]
- Basalt Grey [KN]
- Jura Beige [XB]
- Thassos White [XF]

Meticulous design properties
The countertop is finished to a leathered texture that is both practical and esthetically attractive. Counter end-faces are neatly finished to a square and flat shape. As a result, the surface is hard, resistant to scratching, and further makes any scratches unnoticeable.

Consideration for easy cleaning
Mixing water and oil repellents into the counter material makes stains easy to remove. So, cleaning is easier with the Gralio Series.
Providing a stylish and attractive kitchen

Making the counter look stylish with a thickness as slim as 17 mm gives the kitchen tasteful and inviting ambiance.

The front batten cleat presents the refined and attractive appearance of the counter. (Black or silver batten cleat is selectable.)
Available slim counters

(GRALIO)
- Granite Black[XE]
- Slate Black[XX]
- Basalt Grey[XN]
- Jura Beige[XB]
- Thassos White[XF]

(FLINT)
- View white[YP]
- Calm Grey[YN]
- Calm Beige[YU]
- Grey[YX]
- Pink Flak[XP]
- Purple Flak[XL]
- Grano White[YW]
- Pebble White[YF]

Caution

Precautions for assembling the slim counter

1. For the semi-floating type and floating type kitchen plans, and round access plan, the slim counter comes standard. It also can be used for the wall-mounting plan, Smart Step open plan, Low Step open plan, and High Step open kitchen plan.
2. When using the components shown below in combination with the slim counter, the front batten cleat may stand out.
3. When using the components shown below in combination with the slim counter, the fixed door protrudes from the front batten cleat.
4. When using the components shown below in combination with the slim counter, aluminum components (e.g., front batten cleat and outlet, or front batten cleat and handle) overlap with each other.
5. Outlet for small appliances

Types of counters

Applicable sinks

- Gapless sink stainless steel type: S, M, J type
  - The M type with SURAKURU net is also available.
  - The gapless sink for disposal unit is also available for S and M types.
  - The gapless sink for disposal unit is not available in the EasyClean specification.

Daily cleaning

- Wipe the counter with a damp dishcloth or rub the counter with a sponge soaked in a kitchen detergent, and then wipe it with a damp dishcloth. For stubborn stains, rub the counter with a melamine sponge applied with cream cleanser and then wipe it with a damp dishcloth.
- For stubborn stains: Wipe the counter with bleach diluted to 10%, and then thoroughly wipe it with a damp dishcloth.

Precautions for use

- Be sure to use a trivet, etc. for daily use. Putting a heated pot, etc. directly on the counter will cause the counter to crack, discolor, or deform.

Material

- Special acrylic resin
- Acrylic resin (organic glass materials)

Panasonic test standards for counters

- Impact: The counter shall not incur any deleterious deformation or cracking that affect functioning.

Shape of overhanging edge

- (Non-drain shape) Floating type kitchen plan: • The back surface of artificial marble counters is coated in white.
**Grade D600 stainless steel** for counters, sinks, cleaning standards, and daily applicable tests

Panasonic Materials edge for use overhanging.

</table>

Types of counters

- The Frozen white pattern is not available for the slim counter or the round access type kitchen plan.
- The Frozen white pattern is not available for the slim counter or the round access type kitchen plan.

Caesar Stone*

**A beautiful and luxurious look like natural stone**

A beautiful countertop makes the most of the hardness and low water-absorption of natural quartz crystal. This may cause noticeable color and pattern variations and joints with the counter.

The photo above shows the Frozen [ZF] counter.
- Not available for slim counter.
- Not available for counters of 60 mm in thickness [ZG] Order.

**Caution** For using the Caesar Stone counter

Since this counter uses a material containing a lot of natural stone, it may vary in its color and pattern and contain patterns like black spots due to its unique natural texture. Moreover, the Night sky [ZE] counter includes a pattern that has a transparent look.

Applicable sinks

- Gapless sink stainless steel type: S, M, J type
- The M type with SURAKURU net is also available.
- The gapless sink for disposal unit is also available for S and M types.
- The gapless sink for disposal unit is also available in the EasyClean specification.

D600 stainless steel sink S and M

D600 stainless steel sink S and M

Daily cleaning

**Wipe the counter with a damp dishcloth or rub the counter with a sponge soaked in a kitchen detergent, and then wipe it with a damp dishcloth.**

For stubborn stains, use a toothbrush and then wipe it with a damp dishcloth.

Precautions for use

Be sure to use a trivet, etc. for daily use. Putting a heated pot, etc. directly on the counter will cause the counter to crack, discolor, or deform.

Material

Special acrylic resin

Polyester resin + Natural stone (crystal) [Natural stone content: Approx. 80% to 90%]

Panasonic test standards for counters

**Falling ball impact**

A steel ball weighing 1 kg shall be dropped from a height of 60 cm or more onto the counter.

The counter shall not incur any deleterious deformation or cracking that affect functioning.

**Heat resistance**

The counter shall not incur any significant discoloration or blistering after leaving an oil pan at a temperature of 280 ºC or a heated empty pan at a temperature of 350 ºC for a period of 20 minutes.

Shape of overhanging edge

**Straining groove**

**Back guard**

V-joint**

The counter shall not incur any significant discoloration or blistering after leaving an oil pan at a temperature of 280 ºC or a heated empty pan at a temperature of 350 ºC for a period of 20 minutes.

The Caesar Stone counter requires V-joints at the junction.

- The back surface of artificial marble counters is coated in white.

Color tones vary between printed material and actual products. Please confirm color tones with actual product samples.
A stainless steel sink offers outstanding cleanliness

**Gapless sink / Stainless steel type (See *1)**

<table>
<thead>
<tr>
<th>The stainless steel type of gapless sink with the “SURAKURU Net” makes the workspace larger.</th>
</tr>
</thead>
</table>

- A stain-resistant drain outlet
  - The outlet is integrally formed with the sink to make it stain-resistant.
- Easy to collect and discharge garbage
  - The mesh basket is designed to collect and discharge garbage easily.
- Stainless steel sink

**Both sides of the “SURAKURU Net” can be used.**

- The net is composed of two pieces: a frame and a net. The front and back sides can be selectively used as needed.
- Since the height of the net is flush with the counter surface, a larger work space can be provided.
- Turn the net upside-down and you can use it as a draining basket.

**The “SURAKURU Net” is movable.**

- This feature expands its applications.
- Since the space above the sink can be used as work space, two people can stand side by side and work comfortably.
- You can clean fish on the net at the middle of the sink while running water.

**The gapless surface keeps the sink stain-resistant and easy to clean.**

- Easy Cleaning (See *1)
  - The gapless surface requires only a quick wipe.
  - Since there is minimal gapping between the sink and the counter in which stains are apt to accumulate, you only have to give a quick wipe to keep your sink clean.

**Caesar Stone and Gralio counters engage the stainless steel type of gapless sink in a different way.**

- Easy to collect and discharge garbage
  - The mesh basket is designed to collect and discharge garbage easily.
- Stainless steel sink
- Caesar Stone and Gralio
- Gapless surface
- Stainless steel type
- Easy Cleaning
- Surakuru Net
- Stain resistant
- Resin in a color similar to that of the counter
- Artificial marble counter
- Stainless steel sink
- Artificial marble counter
- Stain resistant
- Resin in a color similar to that of the counter

---

* To do work on the “SURAKURU Net,” set it to a position in which it is fixed.

---

* Add the same color as the counter.
Low noise specification for the stainless steel type

A sheet at the back of the sink dampens the clattering of dishes, the sound of running water, etc.

<table>

#### Options common to all sinks

- **Sub sink**
  - JUG35SC1D
  - Size: Inner size: 337 × 272 × 122
  - Outer size: 376 × 312 × 130
  - The sub sink cannot be used by hanging it on the sink. (It must be put in the sink.)

- **Draining basket (With dish stand)**
  - JUG35SC2C
  - The draining basket cannot be used by hanging it on the sink. (It must be put in the sink.)
  - The draining basket can be placed in the sub-sink.

---

**CAUTION:** When sinks are equipped with a slim/thin-sensor water faucet, the water saving sensor (lower sensor) may react to side deck or sink options depending on the direction of water spout during use.
WonderFULL Cabinets store plenty of items and makes them easy to get at

Even if you store items up at the back of the drawer, this full open type of drawer easily pulls out so you can get at them. The WonderFULL Cabinet provides easy and convenient storage of the items without wasting space.

**WonderFULL Cabinet**

1. **FULL Use of the depth without waste**
2. **FULL Use of the height without waste**
3. **DETAILED Arrangements for even easier use**

Effective dimensions and maximum load capacity (See *1)

Stainless steel cladded drawer bottom
Cladded steel provides a beautiful appearance and facilitates cleaning.
(Except small drawer under the Hob for disposal unit under the sink)

Top panel for floor unit
This top panel adds a boxed framework of good structural stability and sealability to the floor unit.
(Except for small drawers under the sink)

Two base unit colors
Base units of floor units are available in two coated colors: charcoal grey and super white. You can select the color of the base unit according to your kitchen atmosphere and the color of your cabinet doors.

**Soft closing mechanism with full-open slide rails**
Bumpers work approximately 6 cm (approximately 3 cm in case of drawers of 400 mm or less in depth) before the fully closed end of the drawer to quietly close it, thus preventing dishes from hitting each other on impact.

**Smoky grey side panels**
Prevent the protrusion of pot handles, etc.

**Adjustment panels / dividing bars**
Enable users to compartmentalize the drawer according to the items to be stored.
The photo on the left shows a Charcoal grey unit.

**Meticulous specification**

**(See *2)** High enough to store 2-liter plastic bottles

**See *3**

80
### Selectable colors for the base unit and rails

#### Drawer specifications

- Inner and outer surface color of unit: Super white
- Side surface color of rail: White

- Inner and outer surface color of unit: Charcoal grey
- Side surface color of rail: White

#### Resin trays

Resin trays on the upper and lower rows help store small items efficiently. (No resin trays come with the unit.)

#### Tray

- Inner and outer surface color of unit: Charcoal grey
- Side surface of rails: Stainless steel

#### Stainless steel can be selected for the side panels of the drawer by [Order](#). (See *4)

- Inner and outer surface color of unit: Super white
- Side surface of rails: Stainless steel

- Inner and outer surface color of unit: Charcoal grey
- Side surface of rails: Stainless steel

#### Changeable to a stainless steel adjustable tray

A simple and robust stainless steel tray, which can be detached, reattached, and allows partitions to be repositioned, as appropriate. This tray can be easily cleaned.

- Depending on the type of unit, the stainless steel tray may not be changed.

---

*1: For units of 642 mm in depth and provided with no space for piping (with a two-sliding drawer stocker), the sliding distance (depth) and the maximum load capacity differ by the type of the unit.

*2: Limited to 2-liter plastic bottles of 320 mm or less in height. *3: The effective height of the floor stocker is given for units of 850 mm in height. For units of 800 mm in height, the effective height is lower by 50 mm. For units of 900 mm in height, it becomes higher by 50 mm. *4: Not available for sinks with a disposal unit.

Color tones vary between printed material and actual products. Please confirm color tones with actual product samples.
Storing items according to the place and frequency of use makes your kitchen easier to work in.

### Wall-mounting, I type, and 2,550 mm opening width type

- **Hob area**
- **Cooking area**
- **Washing area**

#### Frequently-used small items
- **Effective width:** 335 mm
- **Effective depth:** 575 mm
- **Effective height:** 126 mm

#### Upper row (Drawer tray)
- Trays can be used to store small items together such as bottle openers and measuring spoons.

#### Frequently-used large and heavy items
- **Effective width:** 335 mm
- **Effective depth:** 575 mm
- **Effective height:** 322 mm

#### Middle row
- Can store 2-liter plastic bottles of 320 mm or less in height.

#### Seldom-used heavy items
- **Effective width:** 335 mm
- **Effective depth:** 525 mm
- **Effective height:** 201 mm (See *)

#### Floor stocker
- Good for storing canned foods, scouring pads, sponges, etc.

#### Undersink units
- **Effective width:** 335 mm
- **Effective depth:** 375 mm
- **Effective height:** 201 mm (See *)

#### Drawer unit
- **Effective width:** 335 mm
- **Effective depth:** 575 mm
- **Effective height:** 193 mm

#### Synchro pallet
- Good for stacking and storing frequently used sieves and bowls.

- **Effective width:** 905 mm
- **Effective depth:** 375 mm
- **Effective height:** 201 mm (See *)

- **Effective width:** 935 mm
- **Effective depth:** 425 mm
- **Effective height:** 194 mm

#### Floor stocker
- Can store items, including canned foods and beer cases.

- **Effective width:** 935 mm
- **Effective depth:** 291 mm
- **Effective height:** 194 mm

*The effective height of the floor stocker is given for units of 850 mm in height. For units of 800 mm in height, the effective height of the floor stocker is lower by 50 mm. For those of 900 mm in height, it is higher by 50 mm.*
Color tones vary between printed material and actual products. Please confirm color tones with actual product samples.

### Accessories

**Multi-purpose box**

What is great about the multi-purpose box is that it can store cookware, including ladles and spatulas, in an upright position so that you can quickly take them out.

**Bottle tray**

Convenient for storing oil and seasonings. You can easily detach and clean the tray and the drawer.

- Freely mobile adjustment panel (See *), expandable adjustment panel (See *), and dividing bars come with the unit as standard accessories.

### Underhob units

**Small drawer (Push-open type)**

Width: 150 mm

**Partition**

The front panel is coated in the same color as the cabinet doors. Used for understove units of 750 and 900 mm in width.

### Undersink units

**Undershock sliding drawer**

Width: 750 / 900 / 1,050 mm

Provided with a bottle tray and multi-purpose box.

Provided with convenient drawers for neatly organizing small items for quick easy use.

**Undersink sliding drawer with a hinged door**

Width: 900 / 1,050 mm

Provided with a kitchen knife holder with a lock, cutting board stand, and multi-purpose box.

Provided with a synchro pallet that comes out in sync with the drawer when it is opened.

**Undersink sliding drawer for disposal unit**

Width: 900 / 1,050 mm

Provided with a kitchen knife holder.

(No locking mechanism; can hold 4 kitchen knives.)

If existing piping cannot be moved, a cuttable stocker (piping protection cover) that can be worked on-site is available.

For details, please refer to the information on page 95.
**Floor Unit**

### Undersink units

<table>
<thead>
<tr>
<th>Hinged door without a undersink stocker</th>
<th>Undersink sliding drawer with a hinged door without an undersink stocker</th>
</tr>
</thead>
<tbody>
<tr>
<td>Width: 600 / 750 / 900 / 1,050 mm</td>
<td>Width: 900 / 1,050 mm</td>
</tr>
</tbody>
</table>

Provided with a kitchen knife holder with a lock, cutting board stand, and multi-purpose box.

- The multi-purpose box comes in one width (1,050 mm) only.

### Accessories

- **Cutting board stand**
  - This stand can be detached and placed on the counter.

- **Kitchen knife holder**
  - With a lock (Can hold 4 kitchen knives)
  - This holder is mounted to the back of the door.

- **Kitchen knife holder**
  - (No locking mechanism; can hold 4 kitchen knives)
  - This holder is mounted to the back of the door.

- **Multi-purpose box**
  - Designed to be quickly taken out and store items just by slightly opening the door of the box.
  - Freely mobile dividing bars come with the unit as standard accessories.

  **Dimensions of kitchen knife and cutting board that can be stored in the undersink unit**
  - **Kitchen knife**:
    - Blade: Max. 210 × 60 × 7 mm (thick)
    - Handle: Up to 140 mm
  - **Cutting board**:
    - 490 × 270 × 15 mm (thick, one board)
    - 500 × 270 × 30 mm (thick, one board)

### Undercooking space units

- **Undercooking space unit with two sliding drawers and stocker**
  - Width: 200 / 300 / 350 / 450 / 600 / 750 / 800 / 900 mm

  - Provided with partitions for making effective use of the space in the sliding drawers as a standard accessory (Except units of 200 mm in width).

- **Undercooking space unit with sliding drawers and a rice-chest stocker**
  - Width: 300 mm

  - The rice chest is slim, but provides a capacity of approx. 10 kg.
  - Sliding stocker provided with a top tray.

- **Undercooking space unit with a rack for storing 1.8-liter bottles**
  - Width: 150 mm

  - For storing 1.8-liter bottles and other bottles. The bottom tray can be detached and washed.
  - Provided with hooks for hanging ladles, etc.
The drawer is designed to bear a maximum load capacity of 40 kg and to be smoothly pulled and retracted even if heavy items are stored in it (in case of a drawer of 370 mm in height).

The side panel safely prevents stored items from protruding.

The wagon is provided with partitions for storing 1.8-liter bottles, etc., and refinedly fits into the unit when not in use. A double-tier nondetachable racks are provided on the right and left sides inside the unit. This prompts users to efficient use of the space.

- Maximum load capacity of wagon:
  - 10 kg for the upper rack,
  - 15 kg for the lower rack
- The shape of handle of the wagon cannot be changed.
- The edge of the door is provided with a silver frame.

The whole wagon can be pulled out and easily used even in a corner. A double-tier inner drawer is provided in the back of the unit.

- Maximum load capacity of wagon:
  - 10 kg for the upper rack,
  - 15 kg for the lower rack

* A doormat is provided on the back of the door. Please open and close the hinged door while the wagon is pulled out.
Precaution for cases where the corner unit and the outlet for cooking appliances are located side by side

Please combine the outlet for small appliances with the unit to be installed beside the corner to secure an opening for the door of the corner unit. The outlet is located at the center of the unit under the sink.

**Corner units for L plans**

**Hinged double doors for corner (See *1)**

Width required: 1,050×750 mm
Can store plenty of large pots and items.

Width required: 900×900 mm
For storing large items. Provided with a shelf on the handle side.

**Stowing diagram (unit: mm)**

Caution: If an HFS handle is used, the door opening angle is narrowed.

**Single swinging door with wagon interlock for corner**

Width required: 1,050×642 mm
Provided with a double-tier inner drawer that makes effective use of the space at the back of the unit. Can refinedly store a wagon (option) that can be pulled out and used outside the door.

Caution: If an HFS handle is used, the door opening angle is narrowed.

* This storage unit is installed in combination with the corner filler.

**Attention about a wagon**

- A wagon is with a caster, so please use the one which could excel a caster proof for floor covering material.
- A caster department sinks in a cushion floor by the weight, and there is a fear that a run of a wagon becomes bad, so please avoid.

Pursuing ease of use “within arm’s reach”

For a wall unit on the kitchen side, you can choose a handle-less wall unit or the unit with a handle. The handle-less wall unit gives a kitchen a sophisticated look with its even sleek design.

A simple handle-less unit is also available.

Two base unit colors
Base units can be selected in two coated colors -- charcoal grey and super white -- as with the floor unit.

<table>
<thead>
<tr>
<th>Charcoal grey</th>
<th>Super white</th>
</tr>
</thead>
<tbody>
<tr>
<td>Inner and outer surface color of unit: Charcoal grey</td>
<td>Inner and outer surface color of unit: Super white</td>
</tr>
</tbody>
</table>

Earthquake resistant lock provided as a standard equipment

The earthquake resistant lock senses the shock of an earthquake and automatically locks the door of the wall units, preventing stored items from falling out.

- The earthquake resistant lock may not thoroughly exhibit its performance due to geological features, the structure and the number of stories of the building, and the usage of the unit.
- In order to unlock the lock, strongly press the handle or the top of the door until you hear it click.

SoftDown wall unit (with earthquake resistant lock)

The storage rack moves downward at an almost constant speed. The SoftDown wall unit is provided with a “constant speed damper” and a “load switching function” capable of smoothly moving the storage rack upward and downward.

Constant speed damper

The constant speed damper moves the storage rack downward at an almost constant speed.

This wall unit is built with an oil damper mechanism that keeps the lowering speed almost constant regardless of the load.

Provided with a load switching function

(Except for tall unit)

A lever allows users to switch the load setting according to the weight of stored items so that the storage rack moves upward and downward smoothly no matter what is inside.

Lever setting guide (For the SoftDown wall unit of 375 mm in depth and 900 or 750 mm in width)

SoftDown wall unit for tall unit

(650 mm in depth)

Width: 600/750 mm

Height: 500/700 mm

* The SoftDown wall unit cannot be installed on handleless wall units.

• The incombustible type that can be installed beside the range hood is also available in a 450-mm wide type.
Wall Unit

Flap-up door storage unit

The storage unit is installed at eye level. This enables you to easily reach and smoothly store and take out items. The flap-up door does not interfere with your work.

Door specifications

<table>
<thead>
<tr>
<th>Size</th>

</tbody>
</table>

- The flap-up door storage unit requires a wall unit installed above it (see WEB Hows).
- The flap-up door storage unit cannot be installed under a handleless wall unit.
- Both side panels and the bottom panel are of the incombustible type.

Flap-up door strainer

The flap-up door strainer is installed in an easy-to-use position. You can stack wet dishes, etc. on the strainer as soon as you wash them, which cleans out your sink and counters.

Door specifications

<table>
<thead>
<tr>
<th>Size</th>
<th>Panel door</th>
<th>Aluminium-frame glass door (translucent)</th>
<th>Aluminium-frame resin door (translucent)</th>

<td>900</td>
<td>375</td>
<td>300</td>
<td></td>
</tr>
</tbody>
</table>

- The flap-up door strainer requires a wall unit installed above it (see WEB Hows).
- The flap-up door strainer cannot be installed under a handleless wall unit.
- It is recommended to install the flap-up door strainer under a 700-mm high wall unit. (This reduces the amount of water dripping from wet dishes placed on the strainer.)
- Since the ease of use of the unit varies with your height, please come try the strainer out at the Panasonic showroom.

Precaution for installing the flap-up door storage unit/flap-up door strainer

When the handle of the wall unit is located outside of the flap-up door storage unit (i.e., on arm side), the flap arm and the handle interfere with each other when the door is opened. In order to avoid such interference, change the stopper to the lower position to limit the opening and closing range of the door. The opening range is reduced by approximately 30 mm from that for normal use.
Combination pallet

The combination pallet helps make effective use of the space within arm’s reach under the wall unit. Both the upper shelf (i.e., storage space) and the lower shelf (i.e., temporary space) can be used to clear out cluttered space so that cooking goes more smoothly.

- The combination pallet cannot be installed in the open kitchen plan (with no wall provided at the back because the screws on the back surface of the main unit are exposed). For other detailed installation conditions, please refer to the information on page 220 of the Design catalog.

During storage

During use

Sizes of combination pallet

<table>
<thead>

<td>• Capacity of dust box: 30 liters (Two dust boxes are provided.)</td>
<td>• Provided with a seat elevator, seat rest, and casters, but without any stopper.</td>
<td></td>
</tr>
</tbody>
</table>

### Caution

Since the wagons and kitchen stools are provided with casters, use floor materials of excellent caster resistance. Do not use vinyl flooring. The floor may give under the weight of the casters, thus resulting in deterioration in the traveling performance of the wagon.
• The actual heights of boxes of handle-less wall units (500/600/700/900 mm in height) for kitchen are 480, 580, 680, and 880 mm, respectively.

• Since the height of the range hood is 500, 600, 700, or 900 mm (see Figure 4), a step of approximately 20 mm occurs on the bottom surface of the wall (see Figure 1).

• It is not recommended to install a wall unit with a handle and that without a handle side by side.

When there is a gap of approximately 20 mm between the bottom surface of the handle-less wall unit and the coping of the facing fixture-hanging wall, the bottom surface spacer for wall unit can fill such a gap.

In order to put a kitchen board all over the front wall, cut a notch in a stepped portion between the hood and the electric elevating wall unit/end panel or put a kitchen board on the stepped portion.

In order to install any small appliances that generate steam, secure the dimensions described above.

• Not installable under any handle-less wall unit.

The back guard covers prevent oil stains from reaching the back guard.

For Hob of 600/750 mm in width
JUG075STBCA
• Use for Hob and IH with radiant heater in kitchen plans of 600 mm in depth (U Order).

For triple wide gas plan JUG206STBCA
• Use for the triple wide gas plan of 600 mm in depth (U Order).

The back guard covers prevent oil stains from reaching the back guard.

**Steam resistant parts**

JUG5KL3 (900 mm in width)
JUG135KL3 (1,350 mm in width)

The steam resistant parts protect the butt end of the wall unit from steam.

• In order to install any small appliances that generate steam, secure the dimensions described above.

Wall unit for kitchen

Provided with 2 garbage bag stopper bars.

* The silver color type cannot be installed on the deodorizing unit.

The photo shows a wagon of 900 mm in width.

A dust box can be added.

Dust box 20L

JUG020KWSG

The dust box cannot be added when a deodorizing unit is installed.

(For details, refer to information on page 63 of the Design catalog.)
A cupboard can store food, dishes, and small appliances in places convenient to use and in a smart fashion.

Select a storage unit suited to the types, number, and sizes of the small appliances that you want to store.

Select a storage unit best suited to the types and amount of food you want to store.

Select a storage unit suited to the sizes and shapes of dishes you want to store.

Consider a dedicated storage space so that the dust box will not hinder the use of work space.

Color tones vary between printed material and actual products. Please confirm color tones with actual product samples.
Smart storage of small appliances

- Small appliances can be stored anywhere you like.

- Storing appliances in places convenient for use
- Storing appliances in limited openings

- Storing appliances side by side in the middle unit
- Storing appliances in places hard to be seen from the dining side
- Tall small appliance storage (also available in a wall-mounted type)
- Storing appliances under the counter

Selectable according to home electric appliances you want to store

- For small appliances (e.g. rice cooker and hot water dispenser)
- For the storage of a microwave oven

- Microwave oven storage with a louver (only available in a depth of 650 mm)
- Microwave oven range without a louver

The small appliance and microwave oven storage units are available in five colors that can be matched to your interiors.

- Super white
- Charcoal grey
- Dark wood grain
- Medium wood grain
- Light wood grain

*For the Super white and Charcoal grey series of small appliance storage units, the front plate of the slide shelf is made of aluminum and the slide shelf is coated in light grey. (Those of the Dark, Medium, and Light wood grain series are coated in a wood grain pattern of the same color)*
small appliance storage

Provided without a vent for releasing steam
To use any small appliance that generates steam, pull out the slide counter in advance. The outlet does not have a circuit breaker.

<table>

</tr>
</tbody>
</table>

Provided with a louver  (Width 600 / 750 / 900 mm, Depth 650 mm)
Installing the dedicated louver allows you to store and hide a Panasonic microwave oven (applicable models only) in a neat fashion.  

<table>
<thead>
<tr>
<th>Depth (mm)</th>
<th>Width 600</th>
<th>Width 750</th>

<td>●</td>
</tr>
</tbody>
</table>

The louver is installable only on the Depth-650 mm type cupboard. The color of the louver is selectable from black and silver.

Provided without a louver  (Width 600 / 750 / 900 mm, Depth 450 / 650 mm)
- Check the separation distance from the small appliance you want to store.
- Storage units without the louver are not designed to store any appliance that generates steam such as a rice cooker or hot-water dispenser, or that generates soot such as a kitchen-use deep dryer or electric griddle. Doing so will result in the adhesion of water droplets or oil, leading to the deterioration of the storage box itself.

(Note 1) When a louver for microwave oven is installed, only limited models of Panasonic microwave ovens can be stored in the unit. For details, refer to [Support / Home Building Products and Materials / FAQ] on Panasonic's website.

Color tones vary between printed material and actual products. Please confirm color tones with actual product samples.

The thermostat lock mechanism may not thoroughly exhibit its performance due to geological conditions, the structure and the number of stories of the building, and the usage of the unit. In order to unlock the lock, strongly press the handle or the top of the door until you hear it click.

When the unit vibrates, its door will be automatically locked to prevent the stored items from falling out.

When rotating the mesh basket, you can smoothly access dishes stored at the rear of the basket.

Inner drawer (Maximum load capacity: 20 kg)

The inner drawer helps you take out a dish from the top of a stack of dishes. It is also useful to store frequently-used small items by using optional partitions.

Example of storage using optional partitions
Smart storage of dust box

Dust box wagon easy for sorting garbage

- Refined appearance thanks to coordination with the cabinet doors
- Compact storage of separated garbage
- Free adjustment of space according to the amount of garbage
- The garbage bag stopper bars can be repositioned or even detached.
- A double box type of wagon is also available.

Door type (with guide rail)

- Dust box wagon

Silver color type (with guide rail)

- Provision of a guide rail in consideration of ease of use

The guide rail helps to smoothly pull out and push in the dust box wagon and prevents damage to the unit.

- Dust box wagons without the guide rail (only in silver) are also available.
  (For details, refer to information on page 62 of the Design catalog.)

- A double box type of wagon is also available.

- The silver color type cannot be installed on the deodorizing unit.
  (For details, refer to the information on page 62 of the Design catalog.)

<th>450mm</th>
<th>650mm</th>
</tr>
</thead>
</table>

Selectable width from 1050, 1200, 1500, and 1800 mm to suit the installation space

The size and specification for the inside of the active wall storage unit can be selected according to the type and quantity of items you have, allowing you to store them in a way that suits you.

A wide variety of components can be combined with each other to accommodate the items you want to store.

Different size variations (Unit: mm)

The photo above shows an active wall storage unit having an opening of 1800 mm.

Different door variations

- Panel type door
  - RF of the Allegro 30 Series and five patterns of the Labhaft 40 Series (XT, XP, XK, XN, XW)
  - These doors have two frames in the horizontal direction.

- Aluminum-frame resin door
  - Translucent
  - This door has two frames in the horizontal direction.

- Door type*
  - The door type can be coordinated with the door of your kitchen cabinets.
  - The doors of the Allegro 60 and Rondo 50 Series are not raised but flat.

There is no lineup of active wall storage units for the Mezzo Forte 50 Series.
Wall unit: Recommended to store items that you do not use on a daily basis.

**Shelf plate**
Recommended to use shelf plates in order to store items that are not used often. The height of the shelf plate is adjustable.
Width: 525 / 600 / 750 / 900 mm

**SoftDown wall unit**
You can move the storage rack down to the level of your eyes and easily store and take out items you need.
Width: 600 / 750 / 900 mm
* Designed to be installed at a height of 2350 mm.

Middle unit: Used to store frequently-used items at a height easy to take them out.

**Shelf plate**
Provided with three shelf plates, the height of which is adjustable to suit to dishes you want to store.
Width: 525 / 600 / 750 / 900 mm

**Dish storage with “Rotary mesh basket”**
The rotary mesh baskets allow you to quickly take out dishes stored at the back of the unit. An inner drawer is provided at the bottom. (See page 100.)
Width: 900 mm

**Inner drawer**
Since the inner drawers can be pulled out, you can easily take out items stored at the back. The upper row is provided with a shelf plate.
Width: 525 / 600 / 750 / 900 mm

Floor unit: Useful to store dust boxes and items you want to keep in stock.

**Open**
The open unit allows the storage of a dust box wagon and large box-shaped items.
Width: 525 / 600 / 750 / 900 mm
* For the dust box wagon, refer to information on page 101.

**Mesh basket**
The three sliding mesh baskets are useful to store small items. You can easily take out items stored at the back of the basket.
Width: 600 / 750 / 900 mm

**Inner drawer**
Three sliding shelves allow you to easily take out items stored at the back of the shelves.
Width: 525 / 600 / 750 / 900 mm

Color tones vary between printed material and actual products. Please confirm color tones with actual product samples.
Cup Board

Tall pantry Depth 450 mm

This wall-mounting storage unit with long hinged doors makes your room more refined and spacious.

Tall hinged doors make it possible to use a wide variety of components in combination according to items you want to store.

Different size variations (Unit mm)

A wide variety of components can be combined with each other to accommodate the items you want to store.

Different door variations

Aluminum-frame glass door (Translucent)
This glass door enhances the appearance. It comes with HAS handles (in an aluminum color).

Aluminum-frame resin door (Translucent)
This translucent door helps the kitchen look more spacious. It comes with HAS handles (in an aluminum color).

Door pattern type
The door pattern type can be coordinated with the door of your kitchen cabinets.

The shape of the door varies with the door series. The following series come with split doors:
Wood grain patterns of the Religioso 60 and Arco 50 Series, and Rondo 50, Mezzo-Forte 50, Ritardando 30, Gracioso 20, and Moderato 10 Series.

Depth 450 mm

The photo above shows an active wall storage unit having an opening of 2,700 mm (two storage units having each an opening of 900 mm; two storage units having each an opening of 450 mm). In order to install the tall pantry alongside the wall, use a 20-mm joint strip or an end panel.

Cup Board

Hatch type high counter for small appliances

This hatch high counter allows for storing small appliances in the partition between the kitchen and dining space. Small appliance and microwave oven storage units can be installed side by side.

Different plan and size variations (Unit: mm)

- The back side is covered with decorative panels down to the floor. This is different from the fit on the dining side of the hatch type high counter.
- The total opening of the unit is 1800 mm at a maximum.

*Thickness of top panel of counter: 40 mm (Artificial marble), 20 mm (Melamine) (Back side)

Back-surface decorative panel

The Depth 483 mm type can be combined with the following units.

Hinged door type of high floor unit with a single-row drawer

- Width: 300 / 450 / 600 / 750 / 900 mm
- Height: 1010 mm

- Thickness of top panel of counter: 40 mm (Artificial marble), 20 mm (Melamine)

• To plan the storage for a depth of 650 mm, the depth of only the small appliance storage unit comes to 450 mm. Consequently, if any open unit is installed beside the storage unit, an end panel is required.

Floor unit:

Selectable from three Height 510 mm types and one Height 455 mm type.

Used for open unit

- For the dust box wagon (sold separately), refer to the information on page 101.

Single-row stocker drawer

- Width: 600 / 750 / 900 mm

High floor unit with four-row drawers

- Width: 300 / 450 / 600 / 750 / 900 mm
- Height: 1010 mm

High Tall plan

The High Tall unit is available in two types, sliding door type and hinged door type.

- Sliding door type with useful counter (Aluminum-frame resin door/glass door)

- Hinged door type with SoftDown wall unit and “Rotary mesh basket” (Aluminum-frame resin door/glass door)

- Hinged door type with “Rotary mesh basket” (Aluminum-frame resin door/glass door)

Different plan and size variations (Unit: mm)

Floor unit

Selectable from the Depth 450 mm and 383 mm types and Height 810 mm type.

- Width: 900 mm
- Height: 1340 / 1540 mm

(Provided with four shelf plates)

- Width: 900 mm
- Height: 1340 / 1540 mm

(Provided with three shelf plates)

- Width: 900 mm
- Height: 1340 / 1540 mm

(Provided with five shelf plates; one of which is stationary.)

Useful counter

Maximum load capacity: 10 kg
**Wall-mounting type**

**Active wall storage unit**
- Depth: 450 / 650 mm

**Tall pantry**
- Depth: 450 mm

**High Tall plan**
- Depth: 450 mm

**Tall plan**
- Depth: 360 / 450 / 650 mm

---

In order to install the tall pantry alongside the wall, use a 20-mm joint strip or an end panel.

Be sure to use an end panel on each side of the active wall storage unit. (It is acceptable to use a joint strip alongside the wall.)

In order to use small appliances on the counter, provide an outlet on the wall (electrical work required separately).

* Thickness of top panel of counter: 40 mm (Artificial marble), 20 mm (Melamine)

**Plans posted on this page are typical plans. Sizes other than those shown below are available on request. Please feel free to contact Panasonic.**

---

**Options**
